

THE CENTER FOR ADVANCED COMPUTER STUDIES

at

the University of Louisiana at Lafayette

Lafayette, Louisiana

Proudly announces a presentation

Dr. Kurt Schwehr

Google and the University of New Hampshire

will give a presentation entitled

Big Data from an Earth Scientist's Perspective

* * * *

Abstract

Geophysics, remote sensing, geospatial information systems, oceanography, and other earth science subfields have been dependent on computation for decades. This talk describes how Big Data technologies have revolutionized earth science by, for example, organizing the world's Earth observation information and making it universally accessible and useful.

DATE: FRIDAY, MARCH 23, 2018

TIME: 11:00 A.M. - 12:00 NOON

LOCATION: OLIVER, ROOM 112

Biography

Dr. Schwehr received his B.S. and Ph.D. degrees from Stanford University and the University of California, San Diego, respectively. He is currently a software engineer at Google and an affiliate faculty of the University of New Hampshire's Center for Coastal and Ocean Mapping as well as the Earth Science and Computer Science departments. At Google, he designs and implements systems to manage data collected about the world.
